	Delta Finochem Pvt Ltd	DOC NO : DFPL/ENV/04
		REV NO : 01
		DATE : 16/06/2022

Delta Finochem Manufacturing API's Intermediates, Specialty **Active Pharmaceutical Ingredients (Generics), Drug Intermediates, Quaternary Ammonium Compounds, Quaternary Phosphonium compounds.**

We are focused on the following steps to reducing API in Environment (PIE) through minimization of API residue/losses in wastewater streams.

- Adopting Mass balance approach.
- Periodic review of the manufacturing process to estimate API losses (account for batch and cleaning cycles)
- Periodic review of the manufacturing process to improve yield so that loss of product in the effluent can be avoided.
- Eliminate direct sewer discharges of rejected/spilled material.
- Use dry cleaning practices as much as practical with appropriate disposal.
- Minimize equipment rinse discharge.
- Shall meet environment protection statutory requirements.
- Shall increase environmental awareness among company employees and contract workmen and all stakeholders.
- Complies the API concentration in discharge less than Predicted-No-Effect-Concentration (PNEC).
